# SOLVED.

## FluoroGrip® Protective Films solve graffiti problems for good.

FluoroGrip® fluoropolymer films protect against surface damage caused by graffiti and other environmental factors in a wide variety of commercial and industrial applications.

### *The newest comprehensive anti-graffiti solution*

- Easy to install, clean, inspect and repair
- Can be field applied by hand or laminated in shop
- Outstanding weatherability in a see-through film
- Excellent performance in outdoor environments
- Permanently UV stable
- Anti-corrosion protection of substrate extends service life

#### Easy to use and install to protect:

- Road and traffic signs ■ Steel and concrete structures
- Equipment and enclosures ■ Glass, plastic and other surfaces
- Walls, interior and exterior ■ Transit shelters ■ Bathroom stalls
- Mail boxes, garbage bins, light standards ■ Buses, trucks, subway and rail cars ■ Any painted or unpainted surface

#### Protects against:

- Paints ■ Ink ■ Acids ■ Dirt and Grime
- Permanent Markers ■ Other Stains

***Durable bond ensures long-lasting protection.***

FluoroGrip films withstand a wide variety of stresses such as extreme temperature cycling, UV rays, and a wide range of aggressive chemicals, paints and acids.

FluoroGrip UV-stable, Teflon® films offer a permanent alternative to conventionally etched films due to a patented plasma surface modification. The process creates a permanent, chemical covalent bond between the Teflon® film and adhesive while retaining the full transparency of the film. The bond is permanent enabling it to be used in surface protection applications where currently available film products may fail within 2 to 3 years of use.

***Easy to install for enhanced maintenance procedures.***

FluoroGrip® films offer superior adhesive technology for easy, peel-and-stick installation by existing maintenance crews. Its solid sheet design assures consistent coverage, even on edges and corners and systems are engineered for ease of inspection and maintenance. The films are ideal for use in new construction or ongoing maintenance programs.

- Films are easily cut to match the size and shape of the desired surface area.
- Reduced labor and installation costs
- Films are available in a variety of thicknesses (2-10 mils), widths, and lengths, from 6" to 48" wide and to 150' long rolls .

*Easy application by hand lamination.*

*Easy application by machine lamination.*

*Let us show you the advantages of FluoroGrip® Film for graffiti protection. Contact Integument Technologies for the name of the representative nearest you to arrange a demonstration.*
