

## **BIOGRAPHY**

### **Dr. William Peifer**

Dr. William Peifer is currently Senior Research Scientist at Integument Technologies, Inc. Dr. Peifer received his Ph.D. in physical chemistry from the University of California, Davis in 1986, and subsequently conducted postdoctoral research at the National Institute of Standards & Technology, and the State University of New York at Buffalo. Prior to joining Integument, Dr. Peifer held technical and project management positions in the scientific instrumentation and medical diagnostics manufacturing fields, where he developed or improved industrial processes in melt formulation and high-speed web coating. Dr. Peifer has served as an independent consultant to entrepreneurs and established businesses in the materials science, medical diagnostics, and pharmaceutical industries, has held a visiting faculty appointment in Chemistry & Biochemistry at Canisius College (Buffalo NY), and is certified at the black belt level in Six Sigma and Lean Manufacturing business practices.
